

About

About me

I'm a UI/UX designer driven by a deep passion for understanding users - their needs, behaviors, and motivations - and turning those insights into clean, modern design. My experience spans large-scale redesigns, intuitive mobile and desktop applications, user research, website creation, and close collaboration with Agile product teams to support iterative improvements. Alongside technical expertise, I bring essential soft skills such as empathy, communication, time management, analytical thinking, and adaptability, enabling me to thrive both collaboratively and independently.

Work

Design Experience

AKQA UKA

June 2026 - Current Days

Senior Experience Designer

Joined a creative agency as a Senior Experience Designer.

- Design and lead user-centered solutions for digital products.
- Conduct research, create prototypes, and collaborate across teams to translate user needs into strategy and deliverables.

Woven by Toyota

Aug 2023 - May 2026

UI Designer

Joined one of product teams as a UI designer.

- Collaborate with Product Owners to clarify requirements and translate business needs into actionable UI solutions.
- Work closely with UX researchers and development teams to ensure design feasibility and smooth handoff.
- Lead or participate in design brainstorming sessions to align the team and generate solution directions.
- Create user journeys, information architecture maps, and task flows to support UX decision-making.
- Produce Lo, Mid, and Hi-Fi wireframes, interactive prototypes, and final UI specifications in Figma.
- Maintain visual consistency by contributing to design guidelines and shared component libraries.
- Deliver designs within sprint timelines while balancing quality, technical constraints, and business priorities.
- Communicate design decisions clearly through presentations, annotations, and cross-functional reviews.
- Improved clarity of interface elements by refining component patterns based on usability feedback.
- Streamlined design-to-development collaboration by preparing detailed handoff specs and assets.

Tools: Figma, Jira, Confluence, Slack.
